ANDARA TOOLS AND

## **Using the Jigsaw**

- Wear your protective equipment including ear defenders, dust mask and goggles.
- Always hold the saw properly when working. Keep hands clear of the blade.
- 3. Check that the blade is fitted correctly.
- To prevent damage to the blade, check that there are no nails, screws or metal embedded in the work piece.
- Let the blade stop completely before withdrawing it from the work piece.
- Stop, switch off and remove the plug from the socket before making adjustments or changing the blade.
- Make sure that any ventilation slots in the jigsaw are clear; do not cover them with your hand when you hold the saw.
- If the saw starts to labour and slow down, do not force it so hard. Do not overload
- Keep the cable clear of the blade and any sharp edges on your work.
- 10. Stop the saw if someone approaches you.
- 11. Keep the cable clear of the blade.
- 12. If you think the cable may be cut or damaged in any way, switch off and unplug at the socket before inspecting it. If the cable attached to the reciprocating saw is damaged, stop using the machine. Contact the hire company. If an extension cable has been damaged, do not use it again.
- 13. Take care not to accidentally pull the plug from the socket.
- 14. After switching off, wait for the blade to stop completely before you put the machine down.
- 15. Switch off and remove the plug from the socket before leaving the reciprocating
- 16. If your equipment does not work properly do not attempt to repair it. Contact the hire company.
- 17. You may want to read this leaflet again. Please keep it until you finish work.
