

Using the Concrete Planer

1. Wear protective equipment including goggles and dust mask.
2. Check the diamond wheel is fitted correctly and securely, and the guard is properly adjusted.
3. Always grasp the planer with two hands, one hand on the handle directly above the diamond wheel, and the other on the rear handle so control can be maintained and access to the on-off switch is maintained.
4. Always use the dust bag and empty it when it is half full. Dispose of the dust bag contents carefully and sensibly.
5. Let the concrete planer run up to speed before contacting the work surface with the front roller first. Lower the wheel and base plate carefully so that the planer is flat on the work surface.
6. Keep the base plate firmly in flat, level contact with the surface; the front roller will guide the machine over the uneven surface.
7. If the machine starts to labour and slow down, do not move it across the surface so fast, keep the base plate firmly on the surface.
8. Lift the planer clear of the work surface before switching off.
9. The diamond wheel will continue to rotate for a few seconds after you switch off. Wait for it to stop completely before putting the concrete planer down.
10. Ensure the machine ventilation slots do not become blocked with dust and debris.
11. Keep the cable clear of the diamond wheel and any sharp edges on the work surface.
12. If the cable appears to be cut or damaged in any way, switch off and unplug at the mains before inspecting it. If the cable attached to the machine is damaged, stop using the machine. If an extension cable has been damaged, do not use it again.
13. Take care not to accidentally pull the plug from the socket.
14. Switch off and unplug the machine before leaving unattended.
15. If the equipment does not work properly, do not attempt to repair it. Contact the hire company.

Please keep this leaflet safely as it may be required for future reference

- 230 VOLT MACHINES**
1. Use a residual current device (RCD) to plug the machine into the mains. RCDs are designed to detect faults in the extension cable and switch off the power if they exceed 30 milliamps (mA). If a fault occurs the RCD will trip and switch off the power. This will help protect against electric shock.
 2. Use the "TEST" button to check the RCD is working each time it is used.
 3. If an extension cable is required follow any instructions given by the hire company. If the hire company has not given any specific instructions use only a suitable extension cable supplied with the machine.
 4. Is an extension cable required follow any instructions given by the hire company. If the hire company has not given any specific instructions use only a suitable extension cable supplied with the machine.
 5. Ensure that the extension cable carries a suitable residual current device (RCD).
- 110 VOLT MACHINES (REMOVED)**
1. If using a portable machine ensure any special instructions use only a suitable residual current device (RCD). Plugging the machine into an RCD will prevent damage to the extension cable if it is longer than 30 metres (100 feet). Plugging the machine into a residual current device (RCD) is required if the extension cable is longer than 30 metres (100 feet).
 2. If an extension cable is required follow any instructions given by the hire company. If the hire company has not given any specific instructions use only a suitable extension cable supplied with the machine.
 3. If an extension cable is required follow any instructions given by the hire company. If the hire company has not given any specific instructions use only a suitable extension cable supplied with the machine.
- ELCTRICAL SAFETY**
1. Ensure the correct type of diamond wheel is used. Special care must be taken to fit any other type of diamond wheel. Do not attempt to fit any abrasive wheel to the planer.
 2. Use the "TEST" button to check the RCD is working each time it is used.
 3. Use the correct type of diamond wheel to fit the diamond wheel. Do not attempt to fit any other type of diamond wheel.
 4. Use the correct type of diamond wheel to fit the diamond wheel. Do not attempt to fit any abrasive wheel to the planer.
 5. Ensure the correct type of diamond wheel is used. Special care must be taken to fit any other type of diamond wheel. Do not attempt to fit any abrasive wheel to the planer.
 6. Use the correct type of diamond wheel to fit the diamond wheel. Do not attempt to fit any abrasive wheel to the planer.
 7. Use the correct type of diamond wheel to fit the diamond wheel. Do not attempt to fit any abrasive wheel to the planer.
- Diamond Wheels**
1. Ensure the correct type of diamond wheel is used. Special care must be taken to fit any other type of diamond wheel. Do not attempt to fit any abrasive wheel to the planer.
 2. Use the correct type of diamond wheel to fit the diamond wheel. Do not attempt to fit any abrasive wheel to the planer.
 3. Use the correct type of diamond wheel to fit the diamond wheel. Do not attempt to fit any abrasive wheel to the planer.
 4. Use the correct type of diamond wheel to fit the diamond wheel. Do not attempt to fit any abrasive wheel to the planer.
 5. Use the correct type of diamond wheel to fit the diamond wheel. Do not attempt to fit any abrasive wheel to the planer.
 6. Use the correct type of diamond wheel to fit the diamond wheel. Do not attempt to fit any abrasive wheel to the planer.
 7. Use the correct type of diamond wheel to fit the diamond wheel. Do not attempt to fit any abrasive wheel to the planer.
 8. Use the correct type of diamond wheel to fit the diamond wheel. Do not attempt to fit any abrasive wheel to the planer.
- CONGRUETE PLANER**
1. Check the wheel is suitable for the machine. Do not use any wheeling tool found to be damaged.
 2. Ensure the correct type of material is used to remove the maximum amount of material. Do not use any wheeling tool found to be damaged.
 3. Ensure the correct type of material is used to remove the maximum amount of material. Do not use any wheeling tool found to be damaged.
 4. Ensure the correct type of material is used to remove the maximum amount of material. Do not use any wheeling tool found to be damaged.
 5. Ensure the correct type of material is used to remove the maximum amount of material. Do not use any wheeling tool found to be damaged.
 6. Ensure the correct type of material is used to remove the maximum amount of material. Do not use any wheeling tool found to be damaged.
- Beforw Starting Work...**
1. Ensure so that it is suitable for the extension cable to be removed.
 2. Lay the extension cable out carefully around doorsways or windows where it might get tangled.
 3. Lay the extension cable out the machine. The extension cables (160 feet). The extension cables must only be used between the transformer and the machine.
 4. Ensure so that it is suitable for the extension cable to be removed.
 5. Lay the extension cable out carefully around doorsways or windows where it might get tangled.
 6. Lay the extension cable out the machine. The extension cables (160 feet). The extension cables must only be used between the transformer and the machine.

Hand Held Concrete Planer

The rules and procedures in force where people are at work may require the person responsible for this equipment to carry out a specific risk assessment.

It is important to read this entire leaflet BEFORE using the Hand Held Concrete Plane

1. Always plan the job and envisage any problems in order that they may be dealt with safely.
2. Electricity can be hazardous and must always be used with great care.
3. A concrete planer produces high vibration while in operation - see vibration - reducing the risk.
4. In use, the machine will produce a large amount of dust. Ensure appropriate precautions are taken for yourself and others.
5. This concrete planer is designed for grinding, de-burring and smoothing rough concrete, terrazzo, marble, granite and sandstone. It is ideal for removing shuttering seams off fresh concrete and similar jobs.
6. In operation, the high-speed rotation to the diamond wheel can cause injury or damage if the machine is not used in a careful and controlled way.
7. If you have not used a concrete planer before, take the time to familiarise yourself with the equipment before commencing work.
8. The following items of personal protective equipment (PPE) are the minimum required: Goggles, Dusk Mask - minimum of FFP3, Ear muffs or plugs giving protection at the ear for levels of 85 dB(A), Gloves, Overalls, RCD if using a 230 volt (mains) supply.
9. This machine must not be used by minors or anyone under the influence of drugs or alcohol.
10. This machine is designed for operation by an able bodied adult. Anyone with either a temporary or permanent disability must seek expert advice before using the machine.

Every effort has been made by HAE/EHA to ensure that the information given in this document and supporting material is accurate and not misleading. HAE/EHA cannot accept responsibility for any loss or liability perceived to have arisen from the use of any such document/material. Only Acts of Parliament and Statutory Instruments have the force of law and only the courts can authoritatively interpret the law.

- WORK AREA**
1. Do not use the concrete planer on any surface that may be difficult to clean or asbestos.
 2. Ensure and no-one is close by when operating the concrete planer.
 3. Ensure the planer is not used near noise sources such as compressors or generators.
 4. Ensure the planer is not used near noise sources such as compressors or generators.
 5. Ensure the planer is not used near noise sources such as compressors or generators.
 6. Cover any surfaces or objects that may be difficult to clean.
 7. Do not use the concrete planer on any surface that may be difficult to clean or asbestos.
 8. Ensure and no-one is close by when operating the concrete planer.
 9. Ensure the planer is not used near noise sources such as compressors or generators.
 10. Ensure the planer is not used near noise sources such as compressors or generators.
 11. Ensure the planer is not used near noise sources such as compressors or generators.
 12. Ensure the planer is not used near noise sources such as compressors or generators.
 13. Ensure the planer is not used near noise sources such as compressors or generators.
 14. Ensure the planer is not used near noise sources such as compressors or generators.
 15. Ensure the planer is not used near noise sources such as compressors or generators.
 16. Ensure the planer is not used near noise sources such as compressors or generators.
 17. Ensure the planer is not used near noise sources such as compressors or generators.
- OPERATORS**
1. The following items of personal protective equipment (PPE) are the minimum required for the safe use of the concrete planer. They should be worn at all times and stored when not in use.
 2. Wearing gloves will also protect the operator from sharp objects and tools.
 3. Wearing a hard hat will protect the operator's head from impact injuries.
 4. An approved mask must be worn to protect the operator's nose and mouth.
 5. Wearing a hard hat will protect the operator's head from impact injuries.
 6. Always use the correct type of PPE to protect the operator's body from impact injuries.
 7. Always use the correct type of PPE to protect the operator's body from impact injuries.
 8. Always use the correct type of PPE to protect the operator's body from impact injuries.
 9. Always use the correct type of PPE to protect the operator's body from impact injuries.
 10. Always use the correct type of PPE to protect the operator's body from impact injuries.
 11. Always use the correct type of PPE to protect the operator's body from impact injuries.
 12. Always use the correct type of PPE to protect the operator's body from impact injuries.
 13. Always use the correct type of PPE to protect the operator's body from impact injuries.
 14. Always use the correct type of PPE to protect the operator's body from impact injuries.
 15. Always use the correct type of PPE to protect the operator's body from impact injuries.
 16. Always use the correct type of PPE to protect the operator's body from impact injuries.
 17. Always use the correct type of PPE to protect the operator's body from impact injuries.
 18. Always use the correct type of PPE to protect the operator's body from impact injuries.
 19. Always use the correct type of PPE to protect the operator's body from impact injuries.
 20. Always use the correct type of PPE to protect the operator's body from impact injuries.
 21. Always use the correct type of PPE to protect the operator's body from impact injuries.
 22. Always use the correct type of PPE to protect the operator's body from impact injuries.
 23. Always use the correct type of PPE to protect the operator's body from impact injuries.
 24. Always use the correct type of PPE to protect the operator's body from impact injuries.
 25. Always use the correct type of PPE to protect the operator's body from impact injuries.
 26. Always use the correct type of PPE to protect the operator's body from impact injuries.
 27. Always use the correct type of PPE to protect the operator's body from impact injuries.
 28. Always use the correct type of PPE to protect the operator's body from impact injuries.
 29. Always use the correct type of PPE to protect the operator's body from impact injuries.
 30. Always use the correct type of PPE to protect the operator's body from impact injuries.
 31. Always use the correct type of PPE to protect the operator's body from impact injuries.
 32. Always use the correct type of PPE to protect the operator's body from impact injuries.
 33. Always use the correct type of PPE to protect the operator's body from impact injuries.
 34. Always use the correct type of PPE to protect the operator's body from impact injuries.
 35. Always use the correct type of PPE to protect the operator's body from impact injuries.
 36. Always use the correct type of PPE to protect the operator's body from impact injuries.
 37. Always use the correct type of PPE to protect the operator's body from impact injuries.
 38. Always use the correct type of PPE to protect the operator's body from impact injuries.
 39. Always use the correct type of PPE to protect the operator's body from impact injuries.
 40. Always use the correct type of PPE to protect the operator's body from impact injuries.
 41. Always use the correct type of PPE to protect the operator's body from impact injuries.
 42. Always use the correct type of PPE to protect the operator's body from impact injuries.
 43. Always use the correct type of PPE to protect the operator's body from impact injuries.
 44. Always use the correct type of PPE to protect the operator's body from impact injuries.
 45. Always use the correct type of PPE to protect the operator's body from impact injuries.
 46. Always use the correct type of PPE to protect the operator's body from impact injuries.
 47. Always use the correct type of PPE to protect the operator's body from impact injuries.
 48. Always use the correct type of PPE to protect the operator's body from impact injuries.
 49. Always use the correct type of PPE to protect the operator's body from impact injuries.
 50. Always use the correct type of PPE to protect the operator's body from impact injuries.
 51. Always use the correct type of PPE to protect the operator's body from impact injuries.
 52. Always use the correct type of PPE to protect the operator's body from impact injuries.
 53. Always use the correct type of PPE to protect the operator's body from impact injuries.
 54. Always use the correct type of PPE to protect the operator's body from impact injuries.
 55. Always use the correct type of PPE to protect the operator's body from impact injuries.
 56. Always use the correct type of PPE to protect the operator's body from impact injuries.
 57. Always use the correct type of PPE to protect the operator's body from impact injuries.
 58. Always use the correct type of PPE to protect the operator's body from impact injuries.
 59. Always use the correct type of PPE to protect the operator's body from impact injuries.
 60. Always use the correct type of PPE to protect the operator's body from impact injuries.
 61. Always use the correct type of PPE to protect the operator's body from impact injuries.
 62. Always use the correct type of PPE to protect the operator's body from impact injuries.
 63. Always use the correct type of PPE to protect the operator's body from impact injuries.
 64. Always use the correct type of PPE to protect the operator's body from impact injuries.
 65. Always use the correct type of PPE to protect the operator's body from impact injuries.
 66. Always use the correct type of PPE to protect the operator's body from impact injuries.
 67. Always use the correct type of PPE to protect the operator's body from impact injuries.
 68. Always use the correct type of PPE to protect the operator's body from impact injuries.
 69. Always use the correct type of PPE to protect the operator's body from impact injuries.
 70. Always use the correct type of PPE to protect the operator's body from impact injuries.
 71. Always use the correct type of PPE to protect the operator's body from impact injuries.
 72. Always use the correct type of PPE to protect the operator's body from impact injuries.
 73. Always use the correct type of PPE to protect the operator's body from impact injuries.
 74. Always use the correct type of PPE to protect the operator's body from impact injuries.
 75. Always use the correct type of PPE to protect the operator's body from impact injuries.
 76. Always use the correct type of PPE to protect the operator's body from impact injuries.
 77. Always use the correct type of PPE to protect the operator's body from impact injuries.
 78. Always use the correct type of PPE to protect the operator's body from impact injuries.
 79. Always use the correct type of PPE to protect the operator's body from impact injuries.
 80. Always use the correct type of PPE to protect the operator's body from impact injuries.
 81. Always use the correct type of PPE to protect the operator's body from impact injuries.
 82. Always use the correct type of PPE to protect the operator's body from impact injuries.
 83. Always use the correct type of PPE to protect the operator's body from impact injuries.
 84. Always use the correct type of PPE to protect the operator's body from impact injuries.
 85. Always use the correct type of PPE to protect the operator's body from impact injuries.
 86. Always use the correct type of PPE to protect the operator's body from impact injuries.
 87. Always use the correct type of PPE to protect the operator's body from impact injuries.
 88. Always use the correct type of PPE to protect the operator's body from impact injuries.
 89. Always use the correct type of PPE to protect the operator's body from impact injuries.
 90. Always use the correct type of PPE to protect the operator's body from impact injuries.
 91. Always use the correct type of PPE to protect the operator's body from impact injuries.
 92. Always use the correct type of PPE to protect the operator's body from impact injuries.
 93. Always use the correct type of PPE to protect the operator's body from impact injuries.
 94. Always use the correct type of PPE to protect the operator's body from impact injuries.
 95. Always use the correct type of PPE to protect the operator's body from impact injuries.
 96. Always use the correct type of PPE to protect the operator's body from impact injuries.
 97. Always use the correct type of PPE to protect the operator's body from impact injuries.
 98. Always use the correct type of PPE to protect the operator's body from impact injuries.
 99. Always use the correct type of PPE to protect the operator's body from impact injuries.
 100. Always use the correct type of PPE to protect the operator's body from impact injuries.
- ADJUSTING THE DEPTH OF CUT**
1. The front roller swivelled as one unit enables the diamond wheel to roll over the base plate and therefore reduce the depth of cut.
 2. In addition, the base plate can be independently adjusted for height by adjusting the base plate feet.
- PERSOANL PROTECTIVE EQUIPMENT**
1. Gloves will also protect the operator from sharp objects and tools.
 2. A hard hat will protect the operator's head from impact injuries.
 3. A mask must be worn to protect the operator's nose and mouth.
 4. Hearing protection must be worn to protect the operator's ears.
 5. Eye protection must be worn to protect the operator's eyes.
 6. Foot protection must be worn to protect the operator's feet.
